## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-6, 13, 16-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Weagley et al. 6,425,196 (Weagley' 196).

Weagley' 196 discloses a bucket (10C) on a loader. Merriam Webster's Dictionary, 10<sup>th</sup> edition defines bucket as, "a typically cylindrical vessel for catching, holding, or carrying liquids or solids." This definition is applied and the blades of Weagley' 196 are considered to be buckets since the catch and carry solids. The bucket has a front facing open front, a closed back (curved back seen in Figs. 1, 2 and 5) and opposed sides (40). Weagley' 196 also discloses a bucket attachment (10R) having:

- an open front (Fig. 1)
- a closed back (curved back shown in Fig. 1 and 2)
- first and second opposed sides (40)
- pivotal attachment means (25)

The pivotal attachment means includes:

- a planar member (26)

Art Unit: 3671

- complementary hinge portions (29A and 29B)
- a hinge pin (28)

The pivotal attachment permits the bucket attachment to pivot from a closed, stored position to an open operable position (Col. 5, lines 64-67).

Regarding claims 3-4 and 16-17, Weagley' 196 has a locking means including two cylinder members (30, 32) and a pin (34).

Regarding claims 5-6 and 13, Weagley' 196 discloses providing an identical bucket attachment (10L) on the other side of the bucket (10C).

### ***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground of rejection above. The new ground of rejection was necessitated by Applicant's amendment of the claims.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3671

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
